

**PENDING**

A brief position, white paper is in process to describe the shared value discussed here.

- **Observation of the Scientific Method:** Science allows itself to be questioned and the scientific method provides accuracy when the same experiment, performed multiple times produces the same result. This standard must be honored again. Research should involve data that is accurate, objective, and open to debate. Moreover, just because science CAN do something does not mean it SHOULD. The Nuremburg code and laws against using humans as “guinea pigs” should be enforced.
